### 787 KF Titrino — the reasonably priced KF all rounder

The compact 787 KFTitrino combines extremely easy routine operation with flexibility, thus allowing you to adapt the instrument configuration to your special requirements.

For normal routine water determinations in:

- Technical products,
- Non-essential foods,
- Organic solvents,
- Food and beverages,
- Salts and
- Cosmetics etc.

the START key is all you need, the rest is done automatically. The strongly recommended 703 Titration Stand stirs the content of the titration vessel; aspirates spent solution and adds solvent, both at the push of a button.

For comprehensive documentation of your analysis and for result reports, a printer can be connected; a balance makes the error free transfer of sample weights possible.

Metrodata VESUV' 3.0 Light, a PC program for backup and data base functions is included in the accessories.

---

MEP Instruments is sole distributor of leading names in sample analysis technology in Australia and New Zealand. The joint venture company formed by Metrohm Switzerland and Anton Paar Austria provides comprehensive service, support and training for the whole product line of Metrohm, Anton Paar, Autolab, Camag, Ismatec, Physica and Retsch in Australia and New Zealand.
